

Roach Intensive Treatment Procedure

Step 1:

- It may be necessary to make arrangements for all people, animals, birds, reptiles and aquatic pets to be vacated from premises before treatment. If anyone in your family has a medical condition such as, but not limited to: asthma, pregnancy, heart condition or taking medication of any type, please contact the office and speak with your property management team of your Ace Exterminating representative for additional information.
- All cabinets and cupboards will need to be completely cleared of all utensils, dishes and shelving paper. Please take the time to place these items in an area separated from the kitchen and cover them with plastic, sheets or towels to prevent potential contamination.
- Sanitation reports will be provided as a cooperative measure.
- It may be necessary for the apartment home to be vacated for at least 1 to 2 hours due to the nature of the treatment being provided. This is to insure your safety and the safety of your family and pets.
- Insect monitors will be placed throughout the home to aid in the integrated pest management program that has been set in place.

Step 2:

- An inspection report will be conducted on all areas of previous treatment. In the event a problem still exists, it will be at this time a re-treatment appointment will be scheduled to control the problem. (We ask for 7-10 days in between service visits for best results.)
- In the event a re-treatment is necessary, we will follow the same procedures as listed above.

Step 3:

- It will be at the discretion of your service professional to include baits, dust and additional methods of treatment based on the sole circumstance and condition of your personal home.

**Cooperation on behalf of the property management and its residents will be necessary for the success of the pest program that has been set in place for the control of roaches. In the event the apartment home is not prepared for service when our team arrives, it will not be treated. It will be rescheduled on the property's next service date.
